Statement Of Purpose

Dear Admission Officer

My name is Chukwukere Cosmas Emeka, and I am applying for the Global MBA at C3S Business School in Barcelona, Spain. My academic background is in History and International Studies, but my professional journey has gradually taken me into business, leadership, education and ICT. Through these experiences, I have developed a strong interest in understanding how organizations are managed, how people work together and how businesses can respond to changing environments. I believe the Global MBA is the right next step to help me turn my practical experience into stronger management knowledge and skills.

I obtained my Bachelor's degree in History and International Studies from Imo State University between 2014 and 2018. I graduated with a CGPA of 4.36/5.00 and was recognized as the Best Graduating Student. I later completed my Master's degree in History and International Studies at Imo State University from 2022 to 2024. Although my academic background is not directly in business, my studies developed my research, analytical, communication and critical-thinking abilities. These skills have continued to support me in my professional life and have helped me approach different responsibilities with patience and an open mind.

My professional experience has given me opportunities to develop practical leadership and organizational skills. I currently serve as the Director of Triple C ICT Hub in Owerri, where I am involved in managing the organization, coordinating activities and dealing with different responsibilities connected to its operations. This experience has increased my interest in business management and shown me the importance of good planning, communication, decision-making and leadership. I have also worked as a Sales Manager at Demars and Meltop Investment, where I gained experience in sales and customer relationships. My work as a JUPEB Lecture Facilitator and Tutor at Imo State University and my NYSC experience as a Class Teacher further strengthened my communication, organization and people-management abilities. My leadership experience as High Commissioner/President of NAHISS also gave me the opportunity to work with people, coordinate activities and take responsibility for achieving shared objectives.

I choose the Global MBA because I want to develop a broader understanding of how businesses are planned, managed and developed. My work experience has given me practical exposure, but

I now want to gain formal knowledge that will help me make better management decisions. The Strategic Management module is particularly relevant to me because I want to understand how organizations develop strategies and respond to competition and changing business environments. Leadership in a Changing Environment will help me improve my leadership approach, while Budgeting & Financial Control will strengthen my understanding of the financial side of managing an organization. I am also interested in Global People Management because managing people is an important part of my current responsibilities. Innovation and New Ideas Creation is another area that attracts me because of my experience in the ICT sector and my interest in how technology and new ideas can be used to improve businesses. The Management Investigation will also give me the opportunity to apply what I learn to a practical business issue. I believe this combination of theory, research and practical learning will prepare me for greater management responsibilities.

I choose C3S Business School because of its practical approach to business education. The school places emphasis on case studies, workshops, projects and practical industry exposure rather than relying only on classroom theory. This is important to me because I want to connect what I learn with real business situations. I am also attracted to C3S because of its international learning environment. The school brings together students from different countries and provides an opportunity to learn from people with different experiences and perspectives. I believe this will improve my ability to communicate and work effectively in an international business environment. The opportunity for internships, career guidance, networking and practical industry experience is also valuable to me because I want to continue developing my professional skills alongside my academic knowledge.

I choose Barcelona because it is an international and multicultural business environment with strong connections to innovation, entrepreneurship and technology. Studying in Barcelona will expose me to different business perspectives and allow me to learn in an environment that is different from what I have experienced in Nigeria. I am also attracted to the fact that C3S delivers its programs in English, while offering opportunities for students to learn Spanish. I believe this combination will help me communicate confidently in an international environment and better understand the culture around me.

My short-term goal is to finish my course and graduate with flying colors and take up management roles where I can contribute to business strategy, operations, people management and organizational development. In the long term, after completing the Global MBA, I intend to return

to my home country Nigeria and use the knowledge gained to advance my career in management and business operations. I want to take on senior management responsibilities and develop business initiatives that create value and employment opportunities in Nigeria. I also want to build on my ICT experience and explore ways of using technology, innovation and effective management to improve business operations.

The Global MBA at C3S Business School is a suitable next step for me because it connects my academic abilities, professional experience and growing interest in management. I am not looking to change my past; rather, I want to build on the experience I already have and gain the business knowledge required to take on greater responsibilities. I am prepared to contribute actively to the C3S learning environment, learn from people with different backgrounds and make full use of the practical opportunities available through the program. I believe this experience will help me become a more confident and capable manager and allow me to contribute meaningfully to business development when I return to Nigeria.

Thank You for Considering My Application

Sincerely,

Chukwukere Cosmas Emeka.
